#### PROGRAM LEARNING OUTCOMES:

*The student will be able to demonstrate basic knowledge and/or skills in:*

1. The different functional areas of business – accounting, management, marketing, economics, and finance – by emphasizing their importance in an organization and describing their interrelationship in the organization's attempt to achieve its objectives.
2. The use of cost and managerial accounting concepts and techniques as management tools for planning, controlling, evaluating performance and making decisions.
3. Business mathematics and elementary statistics by accurately performing common business computations, statistical data presentation and analysis.
4. Intercultural writing and speaking appropriate for business.
5. The legal environment and ethical challenges confronting business in general and in the FSM, from both local and global perspectives.
