**Subject:** Need updated info on AFT and AS Ag.

Greetings IRPO,

I will be giving a 20 minute report to the USDA-NIFA Program leader when we meet in Washington two weeks from now. As part of that report I would like to give an historic and current update of the student numbers in the AFT and AS Ag. programs. What I would like is

1. the total number of students registered in AFT and AS degrees by campus and by year
2. The number of transfers from AFT to AS by campus and year (includes both graduates and those students who start as AFT but transfer after they pass the COMET
3. The number of graduates and if possible where they went (if University or working)

I know you may not be able to get all of this but together we might get most of it.

Thanks,

Jim
