

Assessment: Administrative Unit Four Column

C - EMSS - Student Life, Residence Halls, Health Services, Sports and Recreation

Mission Statement: [Office of the Director of Student Life]

The Office of Student Life provides COM-FSM students with a safe and enjoyable living environment conducive to academic success, community development and personal growth. Through campus collaboration, promotes scholastic achievement, encourages respect for self and others and prepares students to explore their place in the larger community.

[Health Services]

The Health Services of the Division of Student Life under the College's Department of the Service Services is committed to providing essential basic health care services to individuals within the College community to improve their health status and promote their quality of life using integrated care including promotion of health prevention of illness and restoration of health.

[Sports and Recreation]

To enrich the educational experiences of tertiary students through sports and recreation in the FSM.

[Residence Halls]

To provide a comfortable, safe, well-maintained and enjoyable living environment that fosters respect for self and others and supports the academic and social goals of resident students. It is our aim to accomplish this mission through outstanding customer service and professional facilities management.

deworming medicines, multi-vitamin supplements, and others.

Target: 2.1 Exceed the rate of students, faculty and staff taking the seasonal influenza by at least 10% from prior year.

2.2 Exceed the rate of students, faculty and staff taking the preventive/prophylaxis treatments by at least 5% from prior year.

Health Service clinic showed that:

A. In 2015-2016, the Health Service received a total of 295 students, faculty and staff for the seasonal influenza vaccination.

B. In 2016-2017, it received a total of 309 students, faculty and staff for the seasonal influenza vaccination.

C. An increase of 14 in headcounts; therefore, an increase by 4.5% in the number of students, faculty and staff who received the flu vaccinations in comparison to prior school year.

D. The established criterion for success was to “exceed the number of students, faculty and staff taking the seasonal influenza vaccinations by at least 10%” from prior school year”; therefore, this criterion has not been met.

However the office logs also showed that:

A. In 2015-2016, the Health Service received a total of 2,065 visits by students, faculty and staff specifically for treatment of health maintenance/prophylaxis including deworming medicines, multi-vitamin supplements and others.

B. in 2016-17 the dispensary received_2,235 visits for the same kind of treatment.

C. An increase of 170 visits; therefore, an increase by 8% in the number of visits for the health maintenance/prophylaxis treatment in comparison to prior school year.

D. The established criterion for success was to “exceed the number of students, faculty and staff taking the health maintenance/prophylaxis treatment by at least 5% from prior years”; therefore, this criterion has been met.

perceived the special presentation on the topic on HIV/AIDS most beneficial to them. While 44 (or 23.16%) of the subjects perceived the singing and dancing contests as most beneficial, 30 (or 15.79) and 55 (or 28.95%) of the subjects perceived the dramas and IEC materials as most beneficial to them respectively.

current subscriptions to nursing journals and other health magazines (10/02/2017)

To further determine the level of knowledge of participants about other health issues specifically diabetes, a post survey consisted of five questions was administered to a non-probability sample of 197 participants to the World Diabetes Day activities. The survey was designed to assess the level of basic knowledge of participants about diabetes, its symptoms, ways to prevent and control it, some of the risk factors of diabetes and long-term complications. Basically the results showed that the subjects had some basic knowledge about diabetes with the highest rating of 95.43% on Q4 (e.g., diabetes can be controlled by diet and exercise) and lowest rating of 63.45% on Q3, (i.e., diabetes means there is too much salt in your blood). The results also showed that 177 (or 89.85%) of the 197 know some of the common symptoms of diabetes indicating "all the above" on Q5 (i.e. signs and symptoms of diabetes include increased thirst, frequent urination, blurry vision, feeling tired, all the above) with only 4 (or 2.03%) of the subjects indicating only "increased thirst" and 2 (or 1.02%) and 14 (or 7.11%) of the subjects indicating only "blurry vision" and "feeling tired" as common symptoms of diabetes respectively.

The results further showed that 170 (or 86.29%) of the subjects know some of the risk factors in developing Diabetes Type by indicating "all the above" on Q6 (i.e., some risk factors in developing type II diabetes include a family history of diabetes, lack of physical activities, overweight, all the above) with 21 (or 10.66%) indication only "a family history of diabetes" and 5 (or 2.54%) indicating only "lack of physical activities" and "overweight".

The results also showed that 170 (or 86.29%) had some knowledge about some of the long-term complications of uncontrolled diabetes by indicating "all the above" on Q7 (i.
