Additional observations: In reference with the data presented above, high percentage showed students are highly interested in hands-on experimentation or class activities.

STUDENTS FINAL GRADES BREAKDOWN:

A = 0 B = 5 C = 0 D = 0 F = 0

Recommendations: Laboratory equipments (NIDA cards) for discrete devices II must be enough for at least 3 to 5 sets to be able for the students to perform their required experimentation. Modify and combine discrete devices I & II or substitute a course for electrical students use so that it focus only on discrete devices that are needed in the electrical controls.
